Maintenance of Certification

**A GUIDE FOR
CLINICAL CARDIAC
ELECTROPHYSIOLOGISTS**

MAINTENANCE OF CERTIFICATION: THE BASICS

Clinical cardiac electrophysiologists renew their board certification through the American Board of Internal Medicine (ABIM) Maintenance of Certification (MOC) program. The MOC program is designed to reflect what physicians do in practice, and there are many options available to clinical cardiac electrophysiologists to meet their MOC requirements.

The ABIM MOC program requirements for clinical cardiac electrophysiologists include:

- ✓ Hold current, valid ABIM certification in Cardiovascular Disease to renew your certification in Clinical Cardiac Electrophysiology. To learn more, visit www.abim.org/moc-policies.
- ✓ Schedule, take and pass the secure ABIM Clinical Cardiac Electrophysiology Maintenance of Certification Examination.
- ✓ Earn 100 points in Self-Evaluation of Medical Knowledge and Self-Evaluation of Practice Performance. You are required to earn a minimum of 20 points of medical knowledge and 20 points of practice performance. The remaining 60 points may be from either medical knowledge, practice performance or both. Note: The points you earn are valid during your participation in MOC and can be applied to the renewal of more than one certification (e.g., Clinical Cardiac Electrophysiology and Cardiovascular Disease) you are maintaining within that time frame.
- ✓ Be licensed and in good standing.

Begin now and take advantage of the many options ABIM offers to complete your MOC requirements. Once enrolled, you can complete as many modules as you wish. You can earn self-evaluation points at any time, and beginning in the sixth year of your current certification, you can schedule your exam appointment.

For practical advice about completing MOC, visit www.abim.org/advice to learn topical insights from fellow ABIM Board Certified physicians.

THE SECURE EXAM

The ABIM Clinical Cardiac Electrophysiology Maintenance of Certification Examination is designed to evaluate the extent of your knowledge and clinical judgment in the areas in which you should demonstrate a high level of competence. Exam questions are developed by a team of clinical cardiac electrophysiologists in practice and in academic medicine. During the exam, you will be asked to demonstrate your mastery in the broad domain of clinical cardiac electrophysiology and the diagnosis and treatment of both common and rare conditions that have important consequences for patients.

The computer-based examination is offered twice a year – in spring and fall – at Pearson VUE test centers, located worldwide. Please visit www.abim.org/ccepexam to find exam dates. Once enrolled in the MOC program, you can choose an exam location and schedule an appointment by contacting Pearson VUE at 1-800-601-3549 or visiting www.pearsonvue.com/abim, selecting "Schedule a Test" in the right-hand column and following the instructions, during the following registration periods:

- Spring MOC Exams - December 1 through February 28
- Fall MOC Exams - May 1 through August 15

Remember, you are eligible to schedule an exam appointment beginning in year six of your certification. You can take the exam before or after you complete self-evaluation modules.

SELF-EVALUATION OF MEDICAL KNOWLEDGE

ABIM medical knowledge modules provide evidence of engagement in periodic self-assessment to guide continuing learning. Each module allows you to perform a diagnostic self-assessment of your strengths and weaknesses in important aspects of the knowledge base underlying each certification area.

- Most ABIM medical knowledge modules are worth 10 points each.
- Each module contains 25 multiple-choice questions.
- Select modules that fit your self-assessment goals.
- Societies also offer learning sessions to assist in completing medical knowledge modules with your peers. Visit www.abim.org/lis for upcoming sessions.

Medical Knowledge Options for Clinical Cardiac Electrophysiologists

- A new Annual Update is released every year for both Clinical Cardiac Electrophysiology and Cardiovascular Disease (10 points each), and there are always three modules available in each area.
- Care for the Underserved Module (10 points)
- Point-of-Care Clinical Question Module (20 points)

Additional medical knowledge options can be found at www.abim.org/mk

SELF-EVALUATION OF PRACTICE PERFORMANCE

Self-Evaluation of Practice Performance provides you with various pathways to apply quality measurement to your practice and then use the resulting data to improve care. These include ABIM PIMs Practice Improvement Modules®, the Essentials of Quality Improvement module for clinically inactive physicians, and the ABIM-Approved Quality Improvement (AQI) pathway.

- PIMs are worth 20 or 40 points each, depending on the PIM chosen.
- Visit www.abim.org/pimdemo for PIM tutorials.
- AQI is worth 20 points. Visit www.abim.org/aqi for more information.
- Earn rewards and recognition from several major health plans for completion of PIMs.

Practice Performance Options for Clinical Cardiac Electrophysiologists

- Communication – Subspecialists (20 points)
- Communication with Referring Physicians (20 points)
- Hypertension (40 points)
- Preventive Cardiology (40 points)
- Self-Directed PIM (20 points) for: (1) physicians using data from approved sources, including the American College of Cardiology: National Cardiovascular Data Registry (ACC-NCDR); or, (2) physicians who have recently completed or plan to complete QI projects in their practices using nationally recognized quality measures
- You can also earn 20 points of Self-Evaluation of Practice Performance credit through ABIM's Approved Quality Improvement (AQI) program. If you serve as a leader or member of a team in an approved program, you may attest to your participation in this activity for practice performance credit. Visit www.abim.org/aqi for a complete list of AQI programs.

Additional practice performance options can be found at www.abim.org/pp.
Select the "Practice Performance Selector Tool" for details.

HOW DO I ENROLL IN MOC?

- Go to the Physician Login, located on the home page of ABIM's website, www.abim.org, and enter your ABIM ID and your password.
- If you have never logged on to your home page before, the default password is your six-digit date of birth (MMDDYY).
- On your personal home page, under "My Maintenance of Certification Program," click on "Enroll in Maintenance of Certification Program" and follow the instructions.
- Complete a practice characteristics survey and update your contact information.
- Save the enrollment confirmation page you receive for your records.

WHAT ARE THE REWARDS?

Your participation in MOC:

- Stands as a marker of professionalism to both peers and patients
- Helps you to stay current with the growth of information relevant to your medical practice
- Provides an opportunity to evaluate your knowledge and skills, receive valuable feedback on your practice and identify and rectify gaps in care
- Offers an opportunity to earn CME credit
- Helps you meet some hospitals' and medical groups' privileging requirements
- Provides opportunity for special recognition in certain health plan provider directories and inclusion in quality-tiered networks

Copyright and Examination Non-Disclosure Policy

All ABIM materials are protected by the federal Copyright Act, 17 U.S.C. § 101, et seq. Access to all such materials, as further detailed below, is strictly conditioned upon agreement to abide by ABIM's rights under the Copyright Act and to maintain examination confidentiality.

ABIM examinations are confidential, in addition to being protected by federal copyright and trade secret laws. Candidates and diplomates who undertake examinations agree that they will not copy, reproduce, adapt, disclose, or transmit examinations, in whole or in part, before or after taking an examination, by any means now known or hereafter invented. They further agree that they will not reconstruct examination content from memory, by dictation, or by any other means or otherwise discuss examination content with others. Candidates and Diplomates further acknowledge that disclosure or any other use of ABIM examination content constitutes professional misconduct and may expose them to criminal as well as civil liability, and may also result in ABIM's imposition of penalties against them, including but not limited to, invalidation of examination results, exclusion from future examinations, suspension, revocation of certification and other sanctions.

With respect to ABIM's Maintenance of Certification (MOC) products, including its Medical Knowledge Modules and ABIM PIMs Practice Improvement Modules®, candidates agree that they will not copy, reproduce or make any adaptations of such materials in any manner; and will not assist someone else in the infringement or misuse of these or any other ABIM-copyrighted works.
